Correctly measure an existing collar
inclusive printable templates

SAMMYLUNADESIGNS

Use these printable templates to determine the neck circumference measurement of your existing collar.

This allows you to determine the correct size for your new collar from SammyLunaDesigns with great certainty!

Instruction manual

1 **Close the collar in the same position as your dog is wearing it.**

2 **Measure the inside circumference of the collar with a flexible measuring tape.** No tape measure to hand? Then simply skip this step.

3 **Now find the approximate collar template you need further down in the document and print it out accordingly.**

4 **Now place the template on the table and the collar on the template. Depending on the type of collar, you may need to help a little with your hands so that the collar takes on a round shape.**

5 **Now determine the size. The following image example will help you to read the size correctly.**
In this example, the yellow line is the correct measurement.

✕ **Wrong**
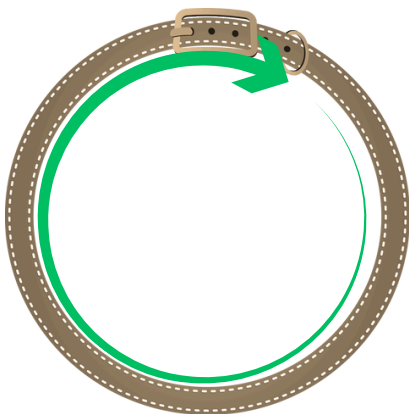

✓ **Correct**

ⓘ inner circumference
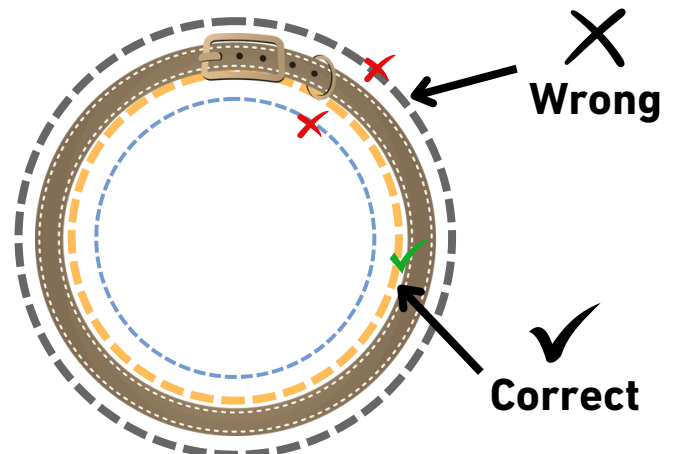

ⓘ Read the dimension correctly
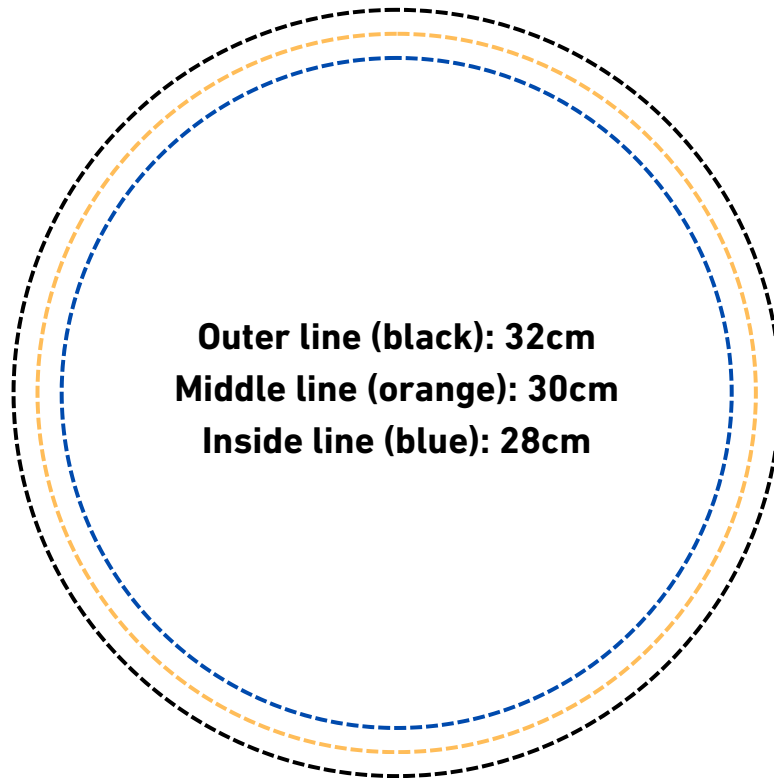

Sizes from 22-30cm neck circumference
